

Cattlemen,

We have a short listing of bulls whose pedigrees have slightly changed since the catalog went to print. Through our extensive DNA testing, we have found some parentage discrepancies in the pedigrees of a couple of our sires.

Wulfs Conversion 3970C was the sire whose pedigree changes had the largest effect on the sale offering. A complete parentage DNA test on his dam confirmed that she was sired by a different bull than we had originally assumed. This pedigree change resulted in a small adjustment to his EPDs and breed percentage, so we wanted to share the updated information.

If you have any questions regarding these changes, please don't hesitate to ask for clarification.

Casey Fanta
